LM Series & CM170 Monitor Firmware Update Instructions
20150602
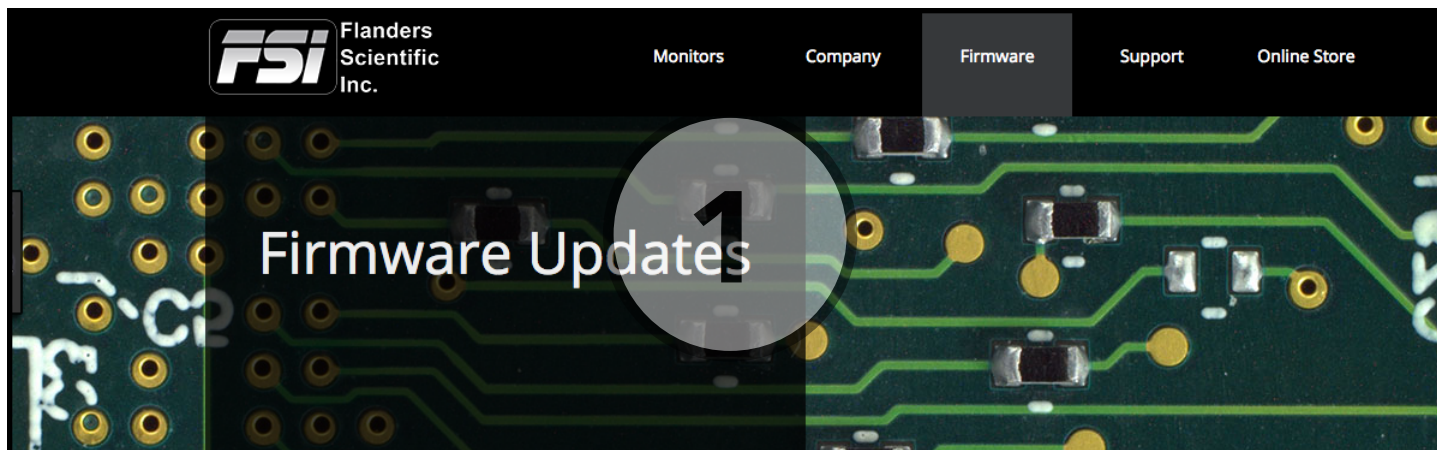

Download new firmware from:
FlandersScientific.com/index/firmware.php

Check your monitor model and current firmware version in the monitor's System Status menu.

If you are currently running firmware older than version 9.53-1907 proceed to step 3.

If you are currently running firmware version 9.53-1907 or later verify the UDisk option found on the monitor's System Menu is set to ON and then skip to step 7.

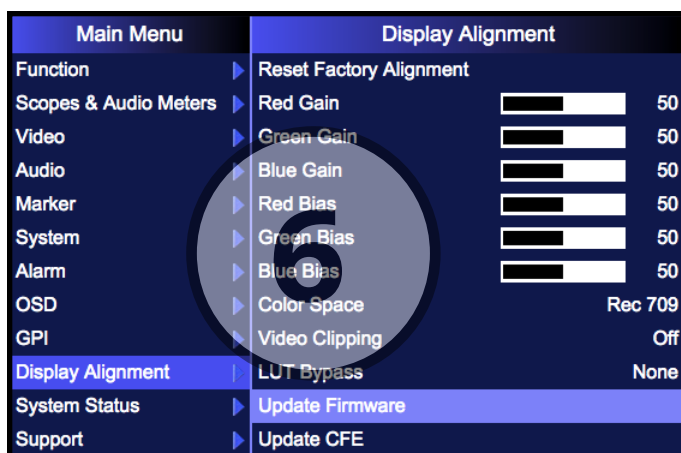

Turn the monitor OFF.

FSi

Flanders Scientific Inc.
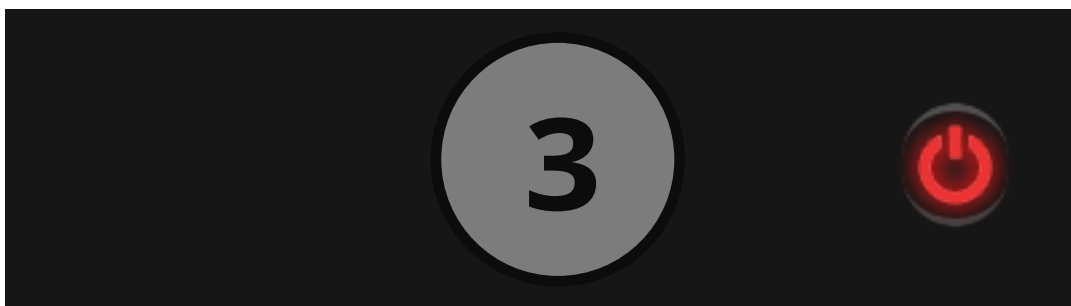

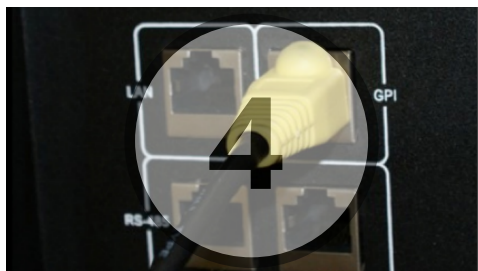

Connect the provided Firmware Update Cable to the monitor's GPI port.

On the monitor's keypad enter the following sequence:
MENU, ENTER, UP, DOWN,
MENU, ENTER, UP, DOWN,
MENU, DOWN, POWER

The monitor has successfully entered update mode if the Green Tally comes on followed by the Amber Tally.

You can also verify that the monitor is in update mode by going to the Display Alignment menu and seeing if the update firmware option is still grayed out.

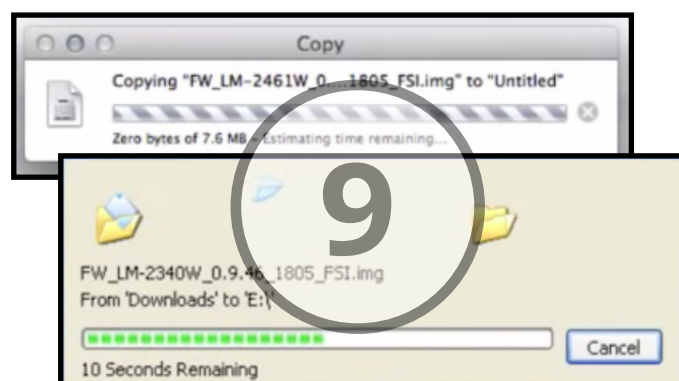

Connect the provided Firmware Update Cable to your computer's USB port.

(If you came from Step 2, Also plug it into the monitor's GPI port.)
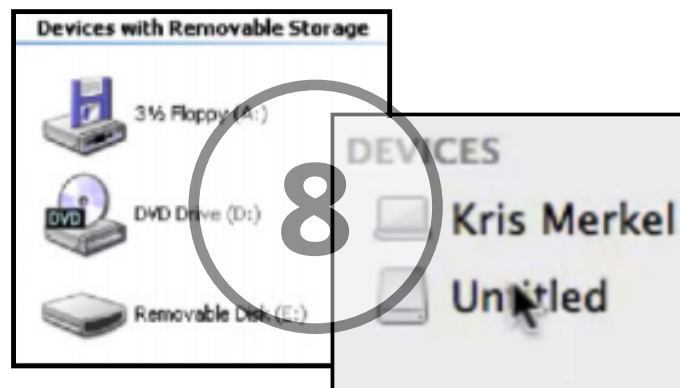

The monitor will appear in Mac's Finder or PC's My Computer as mass storage.

Copy / Paste or Drag and Drop the downloaded Firmware file to the monitor.
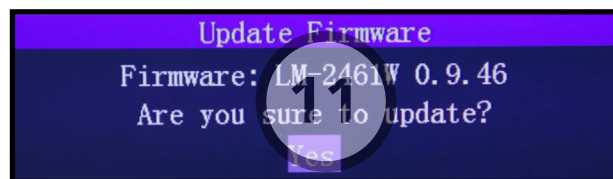

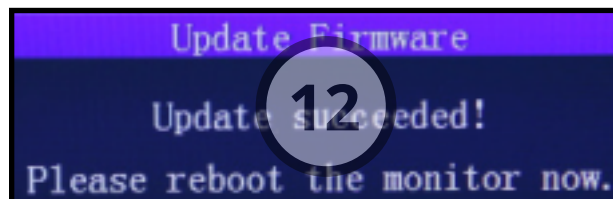

Flanders Scientific Inc.

Select Update Firmware from the monitor's Display Alignment menu.

Confirm Yes when prompted to update.

Reboot the monitor when prompted after the update has succeeded.
